

ISES and JESEE are pleased to announce the journal's 2019 impact factor (3.531) and share other data related to the content and distribution of the publication. JESEE's impact factor increased by 0.50 in the last year

See factors below:

	<b>Q1 2020</b>
Submission to 1 <sup>st</sup> decision with review (average days)	40
Acceptance to publication (average days)	22
Article Views	93,783

In the last year, JESEE's impact factor increased by 0.50 (3.025 in 2018 to 3.531 in 2019), and the journal ranking in relevant subject categories has similarly increased. This reflects the efforts of many individuals, and ISES and JESEE appreciate the efforts of all those involved. We particularly appreciate our editors and assistant editors as well as our reviewers, many of whom are active ISES members.

*JESEE's* ranking in the subject categories it is listed under are:

	<b>2018</b>	<b>2019</b>
Environmental Sciences	88/250	79/265
Public, Environmental & Occupational health	44/185	38/193
Toxicology	39/93	21/193

The impact factor should always be viewed in the wider context of other performance metrics and, in these, JESEE and ISES continues to thrive.

If you're interested in getting involved with the peer review process or the Publications Committee, please email [info@intlexposurescience.org](mailto:info@intlexposurescience.org). Volunteers are always needed and appreciated.
